**ERENZO ASSOCIATION**

*(Extraterrestrial Intelligence Research Association)*

**Official Position Statement on UAP Research**

Greece - 2026 | [www.grufon.org](http://www.grufon.org)

## 1. EXECUTIVE SUMMARY

The ERENZO Association (Extraterrestrial Intelligence Research Association) presents its official position on the study of Unidentified Anomalous Phenomena (UAP).

We emphasize the necessity for a structured, evidence-based, and stigma-free scientific approach, aligned with international developments and the evolving European research landscape.

ERENZO supports the recognition of UAP as a legitimate field of inquiry, requiring interdisciplinary collaboration, modern methodologies, and institutional openness.

---

## 2. ABOUT ERENZO

The ERENZO Association is an officially registered non-profit organization based in Greece, dedicated to the systematic study of UAP.

The association operates under validated statutes approved by the Court of First Instance and aims to contribute to scientific understanding through structured research and responsible public engagement.

---

## 3. POSITION ON UAP RESEARCH

ERENZO recognizes that:

- UAP represent real observational phenomena, documented through multiple sources (visual, radar, sensor-based, and testimonial)
- Their nature remains unidentified, requiring further scientific investigation
- The subject should be approached without sensationalism or premature conclusions

We advocate for:

- A neutral, analytical approach
  - Avoidance of both automatic dismissal and unverified claims
  - Recognition of UAP research as a valid scientific domain
- 

## 4. CORE PRINCIPLES

The work of ERENZO is guided by the following principles:

### Scientific Integrity

Commitment to evidence-based research and methodological rigor

---

### **Data-Driven Analysis**

Emphasis on structured data collection and evaluation

### **Transparency**

Open communication of findings and limitations

### **Interdisciplinary Collaboration**

Integration of multiple scientific and technical fields

### **Open Inquiry**

Research free from stigma, bias, or preconceived assumptions

---

## **5. THE SITUATION IN EUROPE**

Despite growing international attention, UAP research in Europe faces key challenges:

- Stigma surrounding the subject
- Limited funding opportunities
- Fragmented data sources
- Lack of coordinated research infrastructure

These factors hinder scientific progress and discourage researchers from engaging with the field.

ERENZO supports the development of a European research framework that enables:

- Institutional recognition
  - Funding for exploratory research
  - Access to advanced data and sensor systems
  - Cross-border collaboration
- 

## **6. THE ROLE OF GRUFON**

ERENZO operates the platform:

### **GRUFON - Greek UFO Network**

<https://www.grufon.org>

GRUFON serves as the public-facing research infrastructure of the association, providing:

- UAP reporting system
  - Case documentation and archiving
  - Mapping and visualization tools
  - Public access to structured data
-

The platform contributes to the creation of a national and regional UAP data ecosystem.

---

## 7. STRATEGIC GOALS

ERENZO aims to:

- Establish Greece within the European UAP research network
  - Develop standardized data collection protocols
  - Expand case databases and analytical tools
  - Promote institutional and academic collaboration
  - Support scientific dialogue at European level
- 

## 8. LEGAL STATUS & REGISTRATION

Legal Form: Non-profit association

Registered Name: Σύλλογος Έρευνας Εξωγήινης Νοήμονος Ζωής (EPENZΩ)

Country: Greece

Registration Authority: Court of First Instance

Registration Number: 34566

Head Office:

Thiseos 16, Athens, 10562, Greece

---

## 9. POSITION STATEMENT

ERENZO advocates for the recognition of UAP research as a legitimate and necessary scientific field within the European research ecosystem.

---

## 10. CONCLUSION

ERENZO supports the development of a modern, open, and scientifically grounded approach to UAP research.

We believe that addressing stigma, strengthening research infrastructure, and fostering collaboration will allow Europe to advance in the study of complex and emerging phenomena.

---
